

**AFRODITA**  
PROFESSIONAL

# MULTIACTIVE BEAUTY FILLER SHOTS

Discover them!  
Give them the opportunity  
to blow you away.

Give them a shot.

# HYALURON, OXYGEN, VITAMIN C, PROVITAMIN B5, PEPTIDES **and more**

Wonderful cosmetic ingredients your skin longs for, regardless of its age, condition or type. **Afrodita Professional** presents advanced, sophisticated, highly effective formulas of cosmetic concentrates, whose intensive effect inspired us to name them “**SHOTS**”.

**SHOT** – a small dose of a highly concentrated substance used in order to quickly achieve an effect, to produce an immediate result.

**MULTIACTIVE beauty shots** represent a blend of highly effective cosmetic ingredients, whose excellent matching with the skin results in deep action on its vital life functions. In addition to providing intensive vitalisation, active rejuvenation, and deep and long-lasting moisturising, these ingredients eliminate unwanted pigmentation marks, even out the skin tone and make the skin attractive, youthfully full, smooth and silky to the touch. The finest ingredients captured in light formulas serve as a great starting point in creating an optimum beauty routine. We invite you to create your own perfect combination of these miraculous droplets of beauty with the help of our beauty assistants!

/ Renée Rouleau

Be good to your skin.  
You'll wear it every day  
for the rest of your life.

# HYALURON & B5 BOOST SHOT

Luxury moisturising concentrate  
for extremely hydrated, full skin

- **Intensive hydration booster** for **instant hydration** and a **long-lasting improvement to moisture levels** of the skin, which stays pleasantly hydrated for as many as 12 hours after application
- The concentrated moisturising formula contains hyaluronic acid with low molecular weight (20-50 kDa), which penetrates into the deepest epidermal layers of the skin. Due to its extreme ability to penetrate the skin, it restores moisture levels precisely where deeper wrinkles originate.
- The skin looks “fuller” and fresh, as though just renewed. It appears rested, youthful and healthy.
- **Excellent care also for sensitive skin**, as vitamin B5 - panthenol, known for its soothing and regenerative properties, calms and **soothes irritated skin, decreases its sensitivity and strengthens its resilience.**

## Useful little beauty secrets:

It is especially recommended to apply care products with hyaluronic acid in the evening. During the night, our skin loses moisture eight times faster than during the day, which is why there is an even greater need for the hyaluronic concentrate. Use it every morning, but also definitely in the evening, as a foundation for your night-care product of choice.

- Epidermal moisturising filler
- Excellent for sensitive skin

100% of women confirm that their skin is refreshed and hydrated.\*

- Effect of short-term moisturising: **2 hours after application.\*\***
- Effect of long-term moisturising: **hydrated skin for 12 hours after application!\*\*\***

\* user satisfaction rating: 30 women over 14 days (twice-daily application for 14 consecutive days)

\*\* in vivo study involving 16 volunteers, 2 hours after a single application, results measured with a corneometer

\*\*\* in vivo study involving 20 volunteers, 12 hours after twice-daily application, results measured with a corneometer

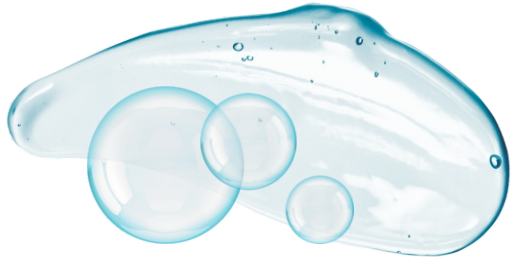

Key ingredients for a miraculous effect:

patented hyaluronic acid (20-50 kDa) + provitamin B5 + ultimate moisturising complex

+ Patented Hyaluronic Complex  
Hyaluronic acid (20-50 kDa) + Provitamin B5

Suitable for sensitive skin

# INSTANT OXYGEN POWER SHOT

Anti-age concentrate  
for youthful skin that is full of life

- **Superior rejuvenating activator with pure oxygen** for instant sensation of new freshness and energy, stimulator of intensive skin renewal that brings visible rejuvenation
- **Anti-oxidant protection of skin cells** from free radicals that attack and age our skin. Most radicals are caused by the sun's UV rays, a polluted environment and poor lifestyle (stress, smoking, alcohol). Eventually, free radicals cause visible and lasting skin damage, such as fine lines, wrinkles and uneven skin tone.
- The stimulating concentrated OXY-formula **promotes collagen synthesis in the hypodermis, improves the structure, smoothes the surface and uplifts the life energy** of even the most tired, dull and atrophied skin.

## Useful little beauty secrets:

Would you like to have a truly sensuous care experience? Upon applying the OXY-concentrate, a wonderful **"bubble effect"** can be felt on the skin. These are tiny bubbles that bind with oxygen from the air and release it directly into the skin. The skin can breathe again, is youthfully revived and shines in all its beauty. Use it every morning to fully refresh and have a lovely, energetic start to the day.

- Protection against damage due to the impact of blue light, UV and IR rays
- Uplifting the skin's energy

Results confirm: skin looks 5 years younger after using for just 1 month.\*

- **smooth and firm skin, reduced fine lines and wrinkles** (93%)\*\*

\* in vivo clinical study with 20 volunteers after 28 days of twice-daily application

\*\* user satisfaction rating: 30 women over 14 days (twice-daily application for 14 consecutive days)

Key ingredients for a miraculous effect:

**oxygen (fifirow BB61) + carnosine peptide + soy isoflavones**

Fifirow BB61 + Peptide Carnosine  
+ Soy Isoflavones

+ 20% Isoflavones  
Fifirow BB61 + Peptide Carnosine

For all skin types + all ages

# VITAMIN C10 SUPER SHOT

## A miraculous beauty concentrate for total skin transformation

- **Pigmentation corrector** for intense improvement of the skin's condition: counters hyperpigmentation, age "marks and spots", by blocking the action of the enzyme that produces melanin (skin pigment). It brightens the skin, removes dark pigmentation marks, i.e. age spots, and evens out the skin tone.
- The serum contains a **10% concentration of highly stable, oil-soluble vitamin C** (Ascorbyl tetraispalmitate), which is significantly more stable and durable than the commonly used ascorbic acid, exhibits better percutaneous absorption, does not cause flaking, irritation or burning sensations, and ensures better results even at a 25-times lower concentration.
- Excellent support in protection against the harmful effects of the sun and UV radiation - it is proven to protect the skin against UVA and UVB damage and provides antioxidant protection against free radicals.

### Useful little beauty secrets:

While vitamin C is the "GOLD standard" among antioxidants, our form of vitamin C (Ascorbyl Tetraispalmitate) is regarded as positively miracle-working. It is an ester of ascorbic and isopalmitic acid, which through enzyme reactions after being absorbed into the skin converts into its active form - pure vitamin C - and as such actively stimulates collagen synthesis. For the complete beauty transformation effect, use it every evening before bed and as an excellent foundation in daily care.

## Can the product be combined with an SPF cream?

Combined with an SPF, vitamin C (Ascorbyl tetraisopalmitate) further protects the skin against the harmful impact of UV rays, which is why we definitely recommend this combination.

- Removal of pigmentation marks (age spots)
- Protection against sun damage and skin highlighter
- Skin recovery formula for complete skin transformation and invigoration

## Users confirm:

- Greater **evenness of skin tone** (100%)\*
- Improved **hydration** and **refreshed appearance** of the skin (100%)\*
- Visibly **reduced pigmentation marks** or age spots (93%)\*

\* user satisfaction rating; 30 women after one month's use (twice-daily application)

Key ingredients  
for a miraculous effect:

10% **vitamin C** (Ascorbyl tetraisopalmitate) + **squalane** + "golden" **sunflower oil**

# DISCOVER THE RIGHT [SHOT] FOR YOU!

Every skin and complexion type has its own individual needs. Find your favourite product texture and the problem your skin is dealing with, and choose your shot. Inter-compatible and easy to combine, beauty concentrates can supplement the routine you followed up until now and perfect your care.

	NEW C10 Vitamin SUPER SHOT	NEW INSTANT Oxygen POWER SHOT	NEW Hyaluron & B5 BOOST SHOT
Texture	Light conditioning emulsion	Gel serum	Light moisturising emulsion
Skin irregularities – reduction of hyperpigmentation	✓

BOTOX-like effect, instant "line filler"			
APPLICATION in the evening/morning	✓	✓	✓

Follow the latest beauty care trends that encourage “layering” cosmetic products in a care routine.

Layering is a skin care technique that originated in Asia. It is about creating optimum care by using or consecutively applying various cosmetic products, whereby each product meets a particular need of the skin. This way, you will create a care that is perfect for you and will help you achieve the desired effect on your skin.

## How should products be layered?

There is one basic, simple rule. When layering products, you should go from thinner textures to thicker ones, from light water-based to rich oil-based textures, which are usually applied at the end of the care.

Why is this important? Applying products while considering the lightness of texture is essential, as thicker, heavier textures contain ingredients that form a protective layer on the skin. By doing so, they make sure the skin is protected and moisturised, while also shielded from external factors. At the same time, this protective barrier prevents light water-based products from being absorbed, which would happen if applied after having previously applied a thicker-textured product. If these products are applied in the last step of the treatment, the active ingredients from light textures would simply not be able to penetrate the skin and the desired effects will not be achieved.

Another principle worth heeding when layering is moderation. Because using too many different products and too many active ingredients can produce unpleasant results (irritation, clogged pores, spots), we recommend practising moderation.
